

# Compact Portable Mesh Nebuliser

Compact, portable mesh nebulizer built for both adults and children. Using piezoelectric ultrasonic vibration through a stainless-steel mesh (MMD  $\sim 3.5\mu\text{m}$ ), it delivers a fine aerosol at  $\geq 0.2\text{mL/min}$  while minimizing medication waste (residual  $< 0.5\text{mL}$ ).

It operates quietly ( $< 45\text{--}50\text{dB}$ ) and weighs just  $\sim 105\text{g}$ , making it ideal for travel. Powered by two AA batteries or via USB, operation is continuous with intuitive LED indicators for status, low liquid, or low battery.

## Product Features

- + Compact and Easy to Use Design
- + Easy to Clean Design with Pop Off Medicine Cup
- + Piezoelectric Ultrasonic Vibration for Fine Aerosol Delivery
- + Supplied with Adult & Pediatric Masks along with Mouthpiece
- + Certification: CE / ISO
- + Complete with 2 x AAA Batteries, 3 Types of Masks, Carry Case

	YWL005
Dimensions	140x60x130 mm
Ambient Working Temp	5°C - 40°C
Operational Volume	<45-50 dB
Waterproof Level	IP22
Not Intended for Use	Pentamidine
Operational Mode	Continuous
Power	2 x AAA (included)
